The program can also play all types of video, audio, and image files, with the added bonus of automatically cataloguing your libraries so that every movie or TV series has its own cover, duration, and other relevant information extracted from different specialized websites such as IMDB or Filmaffinity.. The players 'true potential comes from the ability to install all kinds of plugins which add all sorts of additional functions, from automatic subtitle downloads, to extra modules for viewing YouTube videos, even external programs such as Torrent clients to download files, or streaming services.
