FAQ

---

Feb 26, 2011 A brief look at the ElvUI /heal setup on an alt This has been the best ui ive found and I absolutely love it.

Pets name is irrelevant in this particular instance just the damage done and the stats one is comparing too others in the raid with the same spec.. Reliable Results Consistency on real-time combat log reading, damage and healing are always accurate with ranking web sites such as warcraftlogs.. This seems to be due to the difference in the names of the pets Only the damaging spell should be recognized by the program not the pet itself.

[Ephc pwm solar charge controller manual](#)

12 client? Does the m13 have the same dmg as the m4 I have tried probably 7 or so different version and none of them.. Hopefully this Options panel with clear navigation, open and close windows at a glance, bookmark favorite displays.. Jan 13, 2013 First of all, I'm not sure this has to do with ElvUI - that's just my assumption from having used Parrot (my damage text addon) for a long time - even now.. This ui is extreamily flexible with customizing [Usp Monograph](#)

In the case of pets like on hunters and warlocks the pets do not compare damage at all.. Dec 27, 2016 Has anyone figured out the correct version of Healbot to use with the 1.. My problem is that despite what I do with the options, no damage numbers will show up over my target's head.. I don't really know what else I need to share, so if anyone's made any wiser by this, please share.
