You can choose your language settings from within the program README md dvbviewer-recording-check AutoIt script that checks Recording Service recordings for errors at recording start, and if more than a specific amount of errors has been found in a short period of time, restarts the recording, which often fixes damaged recordings (especially caused by TBS drivers).. The idea for and the original version of this script came from user in this DVbViewer forum thread: requirements/installation Obviously, besides DVbViewer and the Recording Service, this script is intended to be used by the automation software AutoIt for Windows.

It's freeware and you can download it here: It also needs the AutoIt \_XMLDOMWrapper component.
